CHIREC - Medically Assisted Reproduction Centre – HBW/DELTA

Autorization for IVF treatment	<i>Rédacteur : Romain Imbert</i>
FE-MEDI-003- version10-GB	<i>Vérificateur : Déborah Desmet</i>
Date d'application : 12/03/2020	<i>Approbateur : Romain Imbert</i>

Done in : Date :/...../.....

We, Mrs born on

And, Mr/Mrs born on

Prospective parents, hereby confirm that they :

- **Have received the detailed information document on IVF techniques**
- **Have been informed of the costs of care for an IVF treatment (annex flyer)**
- Have been informed on treatment options in the context of medically assisted reproduction, including adoption, as well as medical and legal limits of care.
- Dr _____ (**complete**) has explained the benefits as well as the disadvantages and risks of in vitro fertilization (IVF) treatment, including risks of ovarian hyper-stimulation syndrome, infection or haemorrhage.
- Have accepted that risks and complications that might occur during treatment are not necessarily known and attributable to the doctor.
- Have been informed of the possibility of using psychological support before, during and after the process, and that we have been given contact details of a specialist.
Participation in prior consultation was highly recommended.
- Have been informed that gametes (sperm and oocytes) and/or embryos that are not suitable for the treatment and intended to be destroyed could be used for training and/or improving IVF lab techniques quality.
- Have informed our referring doctor of any previous care in another center and declare not having cryopreserved embryos in another center.
- Have informed our doctor of any stay abroad in the last 3 months.

I / We agree that our medical and administrative data will be made available to the gynaecologists of the CHIREC Medically Assisted Reproduction Centre involved in the treatment and authorize data communication to external bodies with the aim of national and international registration and monitoring of the quality of MAR activity. This communication is transmitted in encrypted form so that the identity of the persons concerned is not disclosed to the agency that receives and analyses the data.

I / We firmly undertake to assume the costs of hospitalization, medical fees, and lab fees involved with this IVF attempt, and any additional costs associated with predictable – or not – complications.

In case I / we decide to stop the treatment, and without any medical contraindication to pursue the treatment, a fee of €925 for medications and €300 for laboratory will be charged.

I / We declare that I/we have requested the MAR Centre of CHIREC, on my own initiative and without coercion, to carry out in vitro fertilization (IVF) with, if necessary, Intra-Cytoplasmic Sperm Injection (ICSI) or Intra-Cytoplasmic Morphologically Selected Sperm Injection (IMSI) followed by embryo transfer.

I / We have been informed that instructions of this convention can be changed at any moment. These modifications will require a written document, signed by all parties of this agreement.

IVF will be performed with

- Gametes of the couple (oocytes from Mrs and sperm from Mr)
- Oocytes of the applicant and sperm received by a donor
 - Personal donor (Name/Nr.....)¹
 - Anonymous donor

¹ If resorting to a personal donor, freezing and storage costs shall be borne by the applicant. The cost of sperm cryopreservation is €150 for each freezing. There are as well fees for freezing of €150 per year (indexable), from the second year and regardless the number of frozen vials. If you have not communicated your decision to stop the treatment within the 30 days following the date of invoice, you are supposed to pursue the treatment and committed to pay the bills.

CHIREC - Medically Assisted Reproduction Centre – HBW/DELTA

Autorization for IVF treatment	<i>Rédacteur : Romain Imbert</i>
FE-MEDI-003- version10-GB	<i>Vérificateur : Déborah Desmet</i>
<i>Date d'application : 12/03/2020</i>	<i>Approbateur : Romain Imbert</i>

In case it would be impossible to obtain the sperm vial, the MAR Centre of CHIREC can perform rescue oocyte cryopreservation.

- I / We agree that the MAR Center of CHIREC perform rescue oocyte cryopreservation.

In this case, an informed consent for oocyte cryopreservation will be signed at the day of oocyte pick-up.

- I / We refuse the rescue oocyte cryopreservation.

In this case, the oocytes will be destroyed.

The embryos are primarily transferred into the woman's uterus during the same cycle.

What happens to fresh and not-transferred embryos :

I / We want the supernumerary – and consequently not used – embryos to be:

- Cryopreserved, in order to attempt a new embryo transfer to complete the parental project underway or for any subsequent one. We therefore fill in the attached questionnaire for embryos cryopreservation.
- Destroyed.

I / We certify having received and understood sufficient information from the CHIREC Medically Assisted Reproduction Centre. We also confirm that we were able to ask any questions and that we have had the time to think in order to sign freely and without coercion the convention.

Prospective parents agree with all the points mentioned above ;

<u>Mrs :</u> Date : ____ / ____ / ____ Signature :	<u>Mr/Mrs :</u> Date : ____ / ____ / ____ Signature :
<u>Referred doctor :</u> Date : ____ / ____ / ____ Stamp and signature	

** In the absence of one of the prospective parents, a **proxy** and a **copy of the ID card** are **required** to be given to the Centre*

This agreement is made in 3 copies, one for the prospective parents, and the two others for the MAR Centre..

CHIREC - Medically Assisted Reproduction Centre – HBW/DELTA

Autorization for IVF treatment	<i>Rédacteur : Romain Imbert</i>
FE-MEDI-003- version10-GB	<i>Vérificateur : Déborah Desmet</i>
Date d'application : 12/03/2020	<i>Approbateur : Romain Imbert</i>

Form for cryopreservation of supernumerary embryos

I / We, the prospective parents, declare that I / we have been informed of the benefits as well as the risks of cryopreservation technique.

I / We are aware that embryos do not react identically to the freezing process and might be altered by the technique. Moreover, over the years, the deposition can be altered for one reason or another. This is why I / we are aware and I / we agree that the CHIREC MAR Centre cannot guarantee, nor be held responsible for the quality of embryos after thawing.

I / We have been advised that the cryopreservation period is legally limited to a 5-year period, beginning on the day of cryopreservation.

I / We wish

- Not to reduce this period
- To reduce it to a fixed period ofyears/months.

This period may be extended in special circumstances. This request must be the subject of a written document, signed and sent by the prospective parents by registered mail. As for any request to assisted procreation, the CHIREC MAR Centre reserves the right to invoke a conscience clause concerning received requests.

If the extension is approved, an annual rental charge of €150 will be required from the prospective parents. If the extension is refused, the MAR Centre can give the contact details of another centre. Prospective parents will have two months to organise, at their own expense, the transfer of their embryos to another centre in the necessary conditions for their preservation.

I / We have been informed that if I / we have not made contact with the CHIREC MAR Centre, at the end of the 5-year period, it will consider the choice mentioned in the Form for Cryopreservation of supernumerary embryos. I / We will be informed of the date of destruction by letter.

If, for reasons of force majeure, the Centre had to be apart from the embryos bank, I/we authorize the MAR Centre to transfer the frozen vials to another bank with which the centre has an agreement. In this case, I/we will be informed by the IVF center with a regular mail within six months following the embryos transfer.

I / We declare that I/we have requested the MAR Centre of CHIREC, on my own initiative and without coercion, to carry out cryopreservation of my/our supernumerary embryos.

New oocytes retrieval shall not be made before having replaced all existing frozen embryos.

No embryo freezing will be made if the signed agreement is not in our possession on the day of oocyte retrieval. The agreement signed by the two partners, or by the applicant, should be handed in on the day of oocyte retrieval at the latest.

Autorization for IVF treatment	<i>Rédacteur : Romain Imbert</i>
FE-MEDI-003- version10-GB	<i>Vérificateur : Déborah Desmet</i>
Date d'application : 12/03/2020	<i>Approbateur : Romain Imbert</i>

What happens to cryopreserved supernumerary embryos:

1/ At the expiry of the 5-year period of cryopreservation, I/we want my/our supernumerary embryos to be (select):

A. Allocated to an anonymous embryo donation program, free of charge and definitive.

To be accepted into the donation program, patients must be maximum 35 years old (for women) and 45 years old (for men) at the date of embryo freezing. After 5 years, you will be contacted by the MAR center to confirm your choice.

You will be invited to complete a personal and familial anamnesis form, to perform blood test and genetic test and to meet a psychiatrist in CHIREC. Informed consent specific to embryo donation must also be signed.

I / we undertake to submit to any examination and to provide any necessary medical information for the implementation of the Act of 06/07/2007 applied under this agreement to enable the Centre to ensure respect for the safety of donated embryos.

Assuming I / we would refuse or stop submitting to any examinations, or if the test results are incompatible with the donation, I / we have been informed my / our supernumerary embryos will be destroyed by CHIREC, according to the current law

B. Destroyed by CHIREC, according to the current law

* **Scientific research:** the law of 6 July 2007 on MAR and destination of supernumerary embryos and gametes provides possibility of donating gametes and/or supernumerary embryos for a scientific research program. I am / We are informed that the CHIREC MAR center does not carry out research on gametes and embryos within the meaning of the law of 11 May 2003 related to in vitro embryo research

I am / We are informed that:

- in the event of a separation, divorce, permanent decision-making incapacity of one of the prospective parents, irresolvable differences of opinion,
- exceeding of the legal age (47 years old) by the prospective mother at the date of the embryo transfer,

the MAR Centre will take account of the last joint instruction given by the prospective parents.

2 / In case of death of one of the prospective parents, we want the cryopreserved supernumerary embryos to be :

A. Preserved for a post-mortem implantation. This implantation can only be performed after a period of 6 months, starting on the day of death of the prospective parent and, at the latest, within two years after the death of the parent. If no news from you within 2 years of death, embryos will be destroyed by CHIREC according to the current law.

As for any request for assisted reproduction, the Chirec MAR Centre reserves the right to invoke a conscience clause concerning received requests. In case of refusal to comply this request, the MAR Centre can give the contact details of another centre. Prospective parents will therefore have two months to organize, at their own expense, the transfer of embryos to the other centre in the necessary conditions for their preservation.

B. Destroyed by CHIREC, according to the current law
